

POSTDOCTORAL POSITION IN INNATE IMMUNITY, PRR SIGNALING AND MOLECULAR IMMUNOLOGY

A 1-year postdoctoral position is available to study the inflammatory pathways elicited by SARS-CoV-2 in innate immune cells in the laboratory directed by Prof. Francesca Granucci at the University of Milano-Bicocca. Research projects will be conducted as part of a collaboration agreement between the University of Milano-Bicocca and the Istituto Nazionale di Genetica Molecolare (Milan, Italy).

Successful candidates should have a Ph.D. degree in immunology, biochemistry, or related disciplines, be motivated and have independent thinking, strong organizational and communication skills. They should be proficient in cell culture and cell purification from different tissues, FACS, transient/stable transfection, immunohistochemistry, immunoprecipitation and Western blotting, RT-qPCR, imaging and other advanced techniques. Knowledge of animal work and handling/genotyping of transgenic and KO mice is highly desirable.

To apply: please submit a CV and the names and phone numbers/e-mail of two/three references to:

Prof Francesca Granucci, e-mail: francesca.granucci@unimib.it and
